CAREER OBJECTIVE

Highly motivated and Resourceful Web Developer bringing in-depth knowledge of latest technology trends to produce clean website design. I've built a few projects by myself and I'm looking for a role where I can grow and learn from other experienced team members.

PROJECTS

MERN-eShop: [<live preview>](#)

- ▶ Built an online store with all basic functionalities using **React, Node.js, MongoDB, Express, Redux, custom APIs** and **React-Bootstrap**.
- ▶ Added features like product display and top rated carousel, search box feature, shopping cart, product details and reviews, user authentication and authorization, local storage, paypal api for payment as well as admin panel for user, product and order management.

Natours Project: [<live preview>](#) [<view code>](#)

- ▶ Built a responsive landing page for fictional tour company using **HTML**, advanced **CSS**, **SASS** and **npm**.
- ▶ Added features like rotating animation for cards, typography animations, popups, background video, retractable navigation bar, etc.

Keeper App: [<live preview>](#) [<view code>](#)

- ▶ Built a responsive web app (clone of google keep) using **HTML, CSS, Javascript** and **React** that allow users to keep notes.
- ▶ Built features like add and delete the notes.

To Do List: [<view code>](#)

- ▶ Built a responsive web app that can create to do list for the user and store that list in local database.
- ▶ Added features like adding items, deleting items and storing the list in local database using mongoDB.
- ▶ Used: **HTML, CSS, Node.js, MongoDB**
